

Team PAU

DV_A1 ReadMe

Folder Structure :

In our main folder , we have the following :

- Report
- Demo video
- Images folder
- Workbook folder
- ReadMe
- Given Dataset.

Image folder consists of all the visualizations that we have plotted , labeled as per their name in the report .

Workbook folder consists of 3 subfolders , one each for each task i.e, task1 , task2, task3.

Inside each subfolder , we have :

- workbook for that particular task(.twbx)
- all the csv files used .
- python codes used for preprocessing (if any).

Since we have used tableau prep for most of the data preprocessing, only the necessary preprocessing python codes have been submitted.

Tableau Workbooks has all the sheets in which we have plotted visualizations. ,dashboard and data stories .

We have submitted our workbooks in .twbx form , hence it should be accessible without downloading the csv files . But if there would be any need for csv files , we have submitted the same inside each task's subfolder.

Note: We have tried our best to keep the audio quality and speed of the video as clear as possible, but by any chance if the pace is too high , please change the speed to 0.8x in the sharepoint.
